Telephone : +94 716 668 925

Email : ramitha.manilka20@gmail.com

Portfolio : <https://ramithax.github.io/Portfolio/>

PROFILE

Enthusiastic undergraduate at SLIIT pursuing a BSc (Hons) in Information Technology with a specialization in Artificial Intelligence. Strong interest in AI/ML and Software Engineering, with hands-on experience in developing full-stack web applications and integrating AI/ML solutions using the MERN stack, Next.js, and Flask. Skilled in designing scalable systems, building RESTful APIs, and delivering efficient, user-centric solutions. Passionate about problem-solving, clean code practices, and continuously learning and applying modern technologies through real-world projects.

EDUCATION

LinkedIn: <https://www.linkedin.com/in/ramitha-manilka-a91324396/>

BSc (Hons) in Information Technology

2024 - 2028 (Expected)

Sri Lanka Institute of Information Technology (SLIIT) | Specialization: Artificial Intelligence

TECHNICAL SKILLS

Languages: JavaScript, Typescript, Java, Python, HTML/CSS

Frameworks: MERN, NextJs, Spring Boot, React, Flask

Databases & Tools: MongoDB, PostgreSQL, Git, GitHub

AI / ML: Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow

PROJECTS

GitHub: <https://github.com/ramithax>

Clothique – Web-Based Clothing E-Commerce Platform

Stack: Next.js, TypeScript, Prisma, PostgreSQL, Better Auth, Stripe, Zustand, Tailwind CSS | Type: Individual Full-Stack Project

- Developing a modern full-stack e-commerce web application focused on online clothing sales, product management, and user shopping experiences.
- Implemented secure authentication and authorization using Better Auth, including user sessions and role-based access control for customer and admin functionalities.
- Developed an admin dashboard for managing products, inventory, and application data with integrated CRUD operations.
- Implemented state management using Zustand for efficient shopping cart handling and stripe payment system
- Designed and integrated database-driven server actions using Prisma and PostgreSQL for managing products, users, and application workflows using Neon.
- Built responsive and reusable UI components using Tailwind CSS and shadcn

- Github Link – <https://github.com/ramithax/clothique.git>

VehicleIQ - Intelligent Vehicle Price Prediction

Stack: Python, Scikit-learn, Pandas, Flask | Type: Individual ML Project

- Engineered 15+ features from raw vehicle and economic data; trained and compared multiple regression models including Linear, Ridge, and Random Forest.
- Achieved best model accuracy using Random Forest with hyperparameter tuning; deployed via a Flask REST API.

Demonstrates end-to-end ML pipeline: data cleaning, feature engineering, model selection, and deployment

Dr.Computer – Web-Based Computer Parts Selling Platform

Stack: MongoDB, Express.js, React, Node.js | Type: Individual Full-Stack Project

- Developing a MERN-based web application focused on providing IT-related services and user interaction features.
 - Implemented JWT token for authorization
 - Implemented core functionalities including user interface design, routing, and basic CRUD operations using React and Node.js.
 - Designed RESTful APIs and integrated MongoDB for managing application data and user requests.
 - Demonstrates full-stack development skills, including front-end design, back-end logic, and database integration in a scalable web architecture.
